

# THE EMPRESS EXPRESS

VOLUME XIV, No. 20

EMPRESS, ALTA. THURSDAY, Oct. 14, 1926

Price: \$2.00 Per Year

## United Church

Rev. N. W. Whitmore, B.A.  
Minister.

Church School, 11 a.m.  
"The reward of a thing well done is to have done it."—Emerson.

Public Worship, 7.30 p.m.  
God has work for every human life—humanity has been ever helped by its devotions. Grant to your own soul the fellowship with the Divine which is inherently craves. Sermon by the Minister, "The Value of Discontent," also a message for the children.

Mr. W. J. McAllister, of Edmonton, will assist with the singing.

## Beautyland and Buffalo

On Sunday next, October 17, worship will be conducted by Rev. Whitmore at  
Buffalo, 11 a.m.; Beautyland, 3 p.m. All are invited.

The Minister's subject will be "The Value of Discontent." Mr. McAllister, of Edmonton, will provide some extra music.

## Auction Sale of Horses

An auction sale of fifty head of young work horses, to be held at Bindloss, on Saturday, October 23. E. R. Fitzger, owner; L. Lush, auctioneer. Sale commences at 12.30.

## Injured by Gun Defect

F. Sibley, is nursing an injured eye as the result of a gun accident, which very easily might have been more serious. When the shell was exploded, a small piece of the lock, weakened by an old flaw, came away in the discharge, striking Mr. Sibley in the head.

We are agents for all magazine literature. Bring us your orders and Renewals. — "Empress Express."

## C.P.R. Crop Report

Winnipeg, Oct. 11.—In Alberta cutting and threshing continued until Friday when rain halted operations. Threshing will be continued in all parts of Alberta today with the exception of the Suffield and the West end of the Brooks subdivision.

Cutting is completed with the exception of the Crownsnest and Red Deer Subdivisions, where from 10 to 25 per cent of the grain remains standing. Threshing is about 50 per cent complete. Reports of wheat growing in stock are exaggerated and outturns are expected to show less damage than rumors indicate. Sugar beets are being harvested and are showing a greater tonnage than last year. Livestock market is active and quite a number of cattle have been shipped.

On Edmonton, Duvango and British Columbia Railway, weather conditions have been showery, but on the whole sufficiently favorable to permit carrying on with the threshing operations. The crop is exceptional in this district, and most of the grain going into the elevators is grading No. 1.

## Carmichael Gets Recount

In the recount for the federal constituency of Kindersley, H. M. Carmichael, was given a majority of 219 over the Liberal candidate, Mr. Dowd.

## Fall Planting of Bulbs

Now is the time to prepare for fall planting of bulbs. A bed of tulips planted this fall will give a grand display for many years without attention. Perennials, shrubs and trees for fall or spring planting.—Mrs. E. S. Sexton, agent for the Patmore Nursery Co.

## Hospital Notes

Mrs. Ab. McKenzie, was admitted to the hospital on Monday, October 11.

Mrs. Slotz, of Leader, who underwent an operation for removal of her left eye, on Thursday last, is progressing favorably.

Dr. McNeill, returned from Saskatoon, Monday, and is taking up his permanent residence here as the partner of Dr. MacCharles.

## "The Stream of Life"

First-class motion pictures in United Church

"The Stream of Life" is a film like no film often seen. It comes very highly recommended by Prof. Ottewill, as the best of their whole film library. Philip Maynard is the man through whose experiences from childhood to old age the stream of life flows—first as a tiny rill, then a meadow brook, later a strong flow of turbulent waters, ending with the full-placid flow as it nears the mighty ocean.

Philip Maynard, more or less reveals an average life. Good home training, frolicsome school days and courtship, followed by removal to the city. His life is not easy, but he succeeds, marries well and is prosperous in business. He is blessed with a very beautiful daughter. When dark days come, however, he loses his early confidence and becomes cynical. His faith is turned to despair, and only through the faithfulness of his mother, his wife and God does he steady himself at the end.

A flag-staff is being erected by the high school pupils outside the main entrance of the school.

## Sale of Cooking and

## Dance at Mayfield

On Thursday evening, October 14, at eight o'clock the Mayfield Ladies' Aid, will hold a Sale of Home Cooking at Mayfield Community Hall. Should the weather be unfavorable for use of the hall, the Mayfield School will be used.

There will be a fish pond for the kiddies. Immediately after the sale a dance will be held; proceeds from same will go towards payment of hall.

## What About a New Ford

London, Ont., Sept. 18.—The proverbial thrill that comes once in a lifetime came to hundreds of Ford owners in the grandstand at the Western Fair today when they saw a standard Ford whizz away from a Whippet and Chevrolet competitors in the special five mile race on the Queen's Park track. The Ford finished nearly six hundred yards ahead of the other contestants, making the five mile grind in 7.27. The race was a special feature of the fair program, resulting from a challenge issued by the Whippet representatives to all owners of light cars.

The spectators saw a thrilling race despite the fact that the Ford led the whole way. For the first four miles the contest was exceptionally keen between the Whippet and the Ford, but the Chevrolet was easily lapped. The Whippet made good time on the corners, but on the straight the Ford zoomed ahead like a racing car.

N. D. STOREY

## Sale of Lands at Bindloss and Cappon, October 25 and 26

Advertisement re Sale of Public Lands, appears in this issue for Improvements District 212 and Improvement District 212 to be offered for sale on October 25 and 26, at Bindloss and Cappon respectively. (See inside page).

## ERADICATE DIPHTHERIA

Diphtheria is essentially a children's disease, picking the victims chiefly during childhood and to a less extent during early adult life. It is always a serious disease, and not uncommonly a fatal one. It frequently kills, mutes or cripples its victims, chiefly young children. Its onset is insidious. There is no alarming rash, such as seen in smallpox or scarlet fever to indicate the malignancy of the disease. There is ordinarily no prostration at the beginning, such as is seen in pneumonia to indicate the seriousness of the infection.

A small greyish white patch on the child's throat is usually the first sign of the disease, and at this stage the child does not appear to be very sick. In such instances the first indication is an obstruction to breathing caused by the growth of diphtheria membrane in the child's breathing passages. At this time the choking, gasping efforts to breathe terrify the child and the parents, but unfortunately, the stage favorable for treatment has passed.

During the years 1922-1924 inclusive, there were 3,000 cases of Diphtheria in Alberta. Of these, 507 or 15 per cent died from the disease.

Of those who died 48 were under one year, 158 were between 14 years old and 351 were between 4 and 14 years of age; 94 per cent of the deaths occurred in children under 15 years.

The gravity of the situation, however, is not due alone to the substantial number of deaths. While an attack of diphtheria is often mild and associated with comparatively little prostration—except in those cases in which the growth of the diphtheria membrane in the air passages literally choked

## MAYFIELD

Public worship will be held in Mayfield School, on Sunday morning, October 24. Rev. A. W. Ingram, of Sceptre, will conduct worship and deliver the message. Mr. Ingram is Secretary of Saskatchewan Conference of the United Church and is very highly regarded by all who know of him. Hour of worship will be at 11 a.m., "sharp," so as to permit of an afternoon service at Beautyland.

## Motors Through From Manitoba

Rev. and Mrs. Fred Chapman and children, of Manitoba, were the visitors of the former's mother and brothers, Mrs. Chapman sr., and Alfred and John, at their farms, north of the river. They proceeded on their way by car to Carmangay, Alberta, Wednesday, where Rev. Mr. Chapman has recently received a ministerial appointment.

## Chevrolet Achievement

Transportation of heavy supplies formerly traversed by burro and llama, to Bolivian mines located 12,000 to 16,000 ft. above sea level in the Andes range has been solved by the use of light automobile truck. Chevrolets figure prominently in fleets recently purchased by mine operators in South America.

## Erect Choir Platform

Local volunteer help on Wednesday evening, built the choir platform in the auditorium of the United Church.

As the child to death—the complications which accompany and follow diphtheria frequently have serious consequences. Various types of paralysis may occur which leave the child crippled for life, mutilated, affected with the nose and throat, and other septic infections, may cause prolonged or permanent disability: heart disease, and other chronic complications which may persist for a long period—but, unfortunately for life may result in a seriously (continued on back page)

## Anglican Church

Services on Oct. 24th (21st Sunday after Trinity):

J. Rowles' Farm, 3.30 p.m.  
St. Mary's Church, 7.30 p.m.  
L. J. Tatham,  
Priest-in-charge.

## Here and There

Whaling operations off the coast of British Columbia this year have been very successful, and to the end of July the fleet had caught 192 whales. There are only six steamers operating this year, while last year the number was eight. The weather has been good to date, and very little fog has been encountered.

Fire chiefs representing the stations in Montreal and various nearby centres left over the Canadian Pacific lines about twenty strong for Windsor recently to attend the annual convention of the Dominion Association of Fire Chiefs, which was held August 24th to 27th. The Association is made up of over 250 chiefs from all parts of the Dominion.

Nearly 2,000 racing pigeons, owned by pigeon racing devotees in Montreal, were shipped through the Canadian Pacific Express yards at Montreal recently to various points in Quebec and Ontario where they were released by the agents at the stations. Many of them were shipped to fly back to their home roosts in Montreal. Practice races of this nature have been carried on through the summer months.

Thomas Meighan arrived in Winnipeg recently from Chicago prior to beginning work on his next picture, "The Canadian". The wheat fields of the Canadian West will be the background for this picture. The location men and other members of the troupe passed through Montreal earlier on their way to the west where they were joined by Thomas Meighan, and they are looking over the Calgary district for a suitable location.

## Annual Bazaar

OF THE UNITED CHURCH will be held in

the new Sunday School room, Saturday, October 16.

Sale of work opens at 3 o'clock. Come early and see the nice assortment of fancy work, aprons, dresses etc., at reasonable prices. A new feature of the bazaar will be the Farm Produce Booth. Afternoon tea will be served from 4.00 to 5.30, and dinner at 6.00.

DINNER MENU  
Scalloped Potatoes Cold Meats  
Baked Beans Brown Bread  
Pickles  
Pie Tea and Coffee.  
Adults, 50c; children under 12 years, 35c.

## Hardware and Supplies

Halter Shanks and Sweat Pads

Tubs, Wash boilers, Granite, Aluminum and Tinware

Alabastine

Paints, Oils, Glass, etc.

Nails; etc.

Tinsmithing and Repairs

M. G. BOYD

## To the OLD COUNTRY

FOR CHRISTMAS AND NEW YEARS

## Special Christmas Sailings

DEC. 7 S.S. MONTROYAL LIVERPOOL  
" 11 S.S. METAGAW GLASGOW LIVERPOOL  
" 15 S.S. MONTCAIM LIVERPOOL

An epic picture of the frontier days  
This is a big special, which includes a cast of over 4,000 people

Friday, October 22

## Here we have "Harold" in "For Heaven's Sake"

starring Harold Lloyd  
A spasm of giggles and giggles

Tuesday, Oct. 26

## Novelty Dance

Music by Sunny South Serenaders

## Estimated 1,200 Dead In Hurricane That Swept Coast Of Florida

Jacksonville, Fla.—Estimates of the loss from the hurricane which swept over lower Florida amounted to over 1,200 in revised figures from the storm-stricken areas.

The casualty list in the Miami section, which bore the brunt of the storm, was placed at 804 by Jerry H. Owen, general superintendent of the Florida East Coast Railway. He estimated 500 dead in Miami, 250 in Hollywood, and 54 in Hialeah, both of the latter places, being suburbs of Miami.

Other reports placed the dead in Fort Lauderdale at 200 and in the Moorehaven section at 140.

As relief workers penetrated the storm-stricken areas, they reported, in addition to reports of the death toll from the most terrible of Florida's storms mount rapidly.

With more than 30,000 people homeless and the injured placed at more than 2,000, first efforts were given to reaching the people with food and medical supplies, reports from all sections of the district brought stories of suffering and want. It was not possible to obtain anything like accurate check of the dead and injured.

## Historic Step Toward European Peace

Deposit of Locarno Treaties With League Ends Mistrust

Geneva, Switzerland—Another historic step in European reconciliation was taken with the deposit with the secretariat of the League of Nations of the ratification of the Locarno treaties of security and arbitration. This was followed by an optimistic statement by Gustav Stresemann, the German foreign minister, to the British correspondents that the Locarno spirit, now officially merged with the League, have completely changed its political situation in Europe.

"It is," he declared, "the end of the policy of mistrust, and the birth of an era of collaboration."

In the opinion of Dr. Stresemann the difficulty was being cleared over German public opinion to the ideas voiced at Locarno, and he now was convinced that a big majority of his people sincerely believed in the Locarno pact.

### Tragedy On Farm

Dimention—Poisonous gas was kept at the bottom of a water well is presumed to be responsible for a double tragedy on the farm of Carl Gilbert, four miles southwest of Telfordville, the body of Gilbert and also that of his housewife, Edith, Gilbert, were found floating at the bottom of the well, even having reports from neighbors that Gilbert had not been seen for a week or more.

### Alfonso Pardons Rebel

Madrid—The commander of the artillery academy at Segovia was sentenced to death by court martial for his participation in the recent revolt of the military academy. However, on the advice of Premier Primo de Rivera and using the royal prerogative, has extended clemency. The news of the action of the king has evoked much praise.

### Hard Winter Predicted

Wellesley Hills, Mass.—A long cold winter, heavy snowfalls and severe blizzards with a touch of adverse crops in their wake is on the weather bill of fare for the western hemisphere if the prediction of Herbert H. Brown, of Washington, comes true. Brown made his forecast before the 15th annual business conference here.

## Proposal Is Made To Hold A Dominion Conservative Convention

Toronto—John R. McNeill, president of the Dominion Conservative Association, issued a statement here indicating that he would ask the opinion of the 41 members of the party executive on the question of holding a Dominion convention.

Mr. McNeill's statement continued: "The Conservative national convention held in Toronto, November 30, 1924, which was attended by several hundred representatives from all provinces, received the most enthusiastic function when in the interests, it became necessary to call

## Wants Seat On League

Claim Is Being Pressed By Irish Free State

Geneva.—A sharp fight is being fought in the league for the ninth non-permanent seat on the council which was originally considered as a post for Portugal.

Other probable candidates are Finland and on behalf of the Baltic group, Czechoslovakia whose claim is supported by some of the powers in the hope of retaining the valuable services of Premier Dones on the council, as well as Ireland.

Ireland has notified all the permanent delegates that in spite of their decision not to demand a seat on the council, Ireland is a candidate for the place and that she is best serving the interests of the dominions as a whole by pressing her claim.

In view of this statement, Sir George Foster has amended his declaration that none of the dominions are candidates for the ninth place, making his exception on behalf of Ireland.

## Killed By Lightning

Farm House Struck By Bolt and Occupants Perish

Winnipeg—A total of four deaths and a number of injured crops, the extent of which will not be determined for some time, were left in the wake of a severe rain and hail storm which swept Western Canada last night.

E. F. Willis, a farmer in the Rana district of Saskatchewan, his wife and two children, were killed when a lightning bolt struck their house during the height of one of the worst storms in recent years.

The farm house was in a mass of flames when neighbors reached the scene. They were unable to check the fire and the frail dwelling burned to the ground. The bodies of the victims, charred almost beyond recognition, were later removed from the ruins.

## Congratulates King

Sir Henry Drayton Says Mr. McNeill's Defeat Is Regrettable

Toronto—"I congratulate the king on his return to power," said Sir Henry Drayton, M.P. for West York and acting member at Ottawa during the absence of Mr. McNeill. "May they, this time, give something with it for Canada."

Mr. McNeill's defeat, he said, was particularly regrettable. His course in attacking his first constituency had been characteristic, although not appreciated. Quebec had remained solid, he said, and this again was a regrettable feature. He thought the vote did not record the thought of Quebec on the real issue of federalism and fiscal questions before the country.

### Imperial Conference

London—There is no anticipation here that a request will come from Ottawa for a further change in the date of the opening of the Imperial conference. Inquiries made by the Canadian Press show that the arrangements already announced for the opening of the conference on October 19 or thereabouts will hold good.

### Hungary's New Currency

Budapest—A new Hungarian currency will come definitely into effect on January 1, 1927, when the 1,000 and 1,000,000 crown (\$147 and \$1,470) notes now in use begin to disappear from circulation.

## Is Again Premier

MR. HON. W. L. MACKENZIE KING

## Candidates Lose Deposits

Liberal Candidates in Toronto and York Fared Badly

Toronto—Nine candidates in the Toronto and York district lost their deposits in the voting, according to the returns compiled. There will be other additions to the total figures, but it is not expected the result will be materially affected.

The Liberal candidates in the Toronto and York losing their deposits were:

Shipley, in Toronto, South; Murdoch, in Toronto High Park; Tipping in Parkdale; Hunter, in West York; Boyd, in Toronto North West; Reid, in Toronto, Scarborough; and Mac Bennett, in Toronto East. Both Liberal candidates—Stanton in Toronto North West and Macdonald in West Centre—also lost their deposits.

Each of the candidates who lost their deposits will forfeit \$200 to the Dominion Government.

## Robert Forke Satisfied

Former Leader of Progressive Party Comments On Elections

Brandon—The federal election results were "very satisfactory," declared Robert Forke, former leader of the Progressive party, when interviewed. Mr. Forke, who registered his seat in Brandon, having the endorsement of both the Liberal and Progressive parties, added the results were particularly gratifying both from a Dominion and provincial viewpoint.

The former Progressive leader had no comment to make when asked about rumors from Ottawa that he might enter the cabinet of Right Hon. W. L. Mackenzie King.

## Family Settlement Plan

Lord Clarendon Says Scheme Provides Canada With Picked British Settlers

Montreal—"A conspicuous success," was how Lord Clarendon regarded the Lord family settlement scheme which has provided Canada with a flow of picked British settlers during the past two seasons. Lord Clarendon was in Montreal en route to the Maritime Provinces. He said he would return home in favor of renewal of this form of settlement, which was in his mind the best kind of colonization.

Lord Clarendon

Charlie Chaplin

## The Long and the Short of It

Wee "Gordie" Wood, one of the best known comedians of the English stage, sailed from Montreal the other day on the Canadian Pacific ship Montrose after an extended tour of America.

He is seen in contrast with William Weber, General Agent, Atlantic Ports, Canadian Pacific, on the morning of departure.

## LIBERAL PARTY WILL ONCE MORE ASSUME POWER

Ottawa—Final returns received strengthen the position of the Liberals. The Liberal party will have 175 straight representatives, at least, in the new parliament, while Conservatives will have 91; Liberal-Progressives 11, and Progressives 5. The remainder will be made up of United Farmers of Alberta, Laborites and Independents.

The impression is that the government will resign, as soon as the Liberal party is able to take over the reins of office. Former Premier King with 118 of the 245 seats in the house, would then form a cabinet depending on support mainly from the eleven Liberal-Progressives and 5 Progressives elected.

Talks of a Liberal-Progressive coalition is already being suggested in political circles here, and in this connection it is altogether likely Mr. King will include Robert Forke, former Progressive leader, in any ministry which he might be called upon to form.

In all probability parliament will be called to assemble in November.

On October 19, Mr. King is due in London for the Imperial conference. Some months ago, the Canadian Government accepted the invitation to host the conference and there is a feeling of national much in the air. Important questions are likely to arise at the conference and there is a feeling that the prime minister should be there in person. At the same time, there is questioning whether he will be able to form his government and transact necessary public business in the interval.

One of the surprises of the campaign was the decline in Conservative strength in Ontario and the prairie. In Ontario, the Conservative representation dropped from 65 to 53.

In Manitoba, where Conservatives held seven seats in the last parliament, they will have none in the next. In the whole of the three prairie provinces, there has up to the present been only one Conservative returned against nine in the last parliament.

In Quebec, where Conservatives had counted on gains, their representation remains the same. They have four seats in the last parliament.

The prime minister himself failed to secure election in Prince Albert, Regina, and five of his ministers, three of them from the province of Quebec, were defeated. On the other hand the Liberal party, headed by Right Hon. W. L. Mackenzie King, now constitutes the largest group in the new parliament.

Mr. King and all the members of the former government who contested ridings were returned by the electorate. Mr. King was elected in the constituency of Prince Albert, Sask.

### War Against Indians

Mexico City—Aeroplane and gas bombs will be used against the Yaqui Indians, now in revolt in the state of Sonora. The Mexican war department also ordered out cavalry and infantry. The Yaquis in rebellion complain that many of their tribal lands have been expropriated and that all demands for rehabilitation have been ignored.

Soldier in uniform

Soldier in uniform

Oldest Negro Regiment Disbanded Kingston, Jamaica.—The British Government has decided to disband the West India Regiment, the oldest negro unit in the British Empire. The decision has caused much disappointment here.

## Tariff Board Will Consider Applications For Reductions In Duty

## American Citizen Killed

Mexican Bandits Slay Wealthy New Yorker, Hails For Ransom

Mexico City—Jacob Rosenthal, a wealthy New York citizen, was murdered by his bandit captors on Wednesday night when Mexican troops closed in upon them.

Having failed to receive the \$10,000 ransom demanded and being hampered in their flight by the weak old man, the criminals killed him rather than let him be rescued alive by the federal troops with whom they were engaged in a running fight.

The tragedy occurred in a wild country less than 40 miles from Mexico City. The federal troops had tracked down the gang and had killed two of the bandits when the pursuit was halted by the recovery of the body of the captive. Later the pursuit of the bandits, who are believed to be only a small group, was resumed.

## Gains Made By Parties

Change in Standing of Different Parties Aids Election

Toronto.—The Canadian Press issued the following final summary of gains by parties:

Liberals from Conservatives, 22; Liberals from Progressives, 1; Liberals from Liberal-Progressives from Conservatives, 2.

E.F.A. from Liberals, 2; Labor from Conservatives, 1.

The standing at disbandment was: Conservatives, 115; Liberals, 101; Progressives, 24; Labor, 2; Independent, 2 and 1 vacancy.

## Fighting In China

British Cruiser Has Been Ordered to Leave For Seat of Trouble

Devonport, England.—The British cruiser, H.M.S. Carlisle, has been ordered to leave for China. The "Red" Cantonese forces made another attack on Wu Chang, but again were repulsed. The bombardment killed a number of non-combatants. The food shortage is acute.

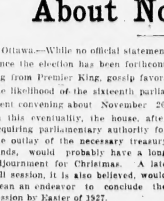

A relief expedition is being organized to rescue missionaries and other foreigners at Wu Chang. The British gunboats, H.M.S. "Oriskany" and H.M.S. "Ilex," have been ordered to the area while a naval detachment has been ordered to the area.

### Mexican Indians in Revolt

Mexico City—Aeroplane and gas bombs will be used against the Yaqui Indians, now in revolt in the state of Sonora. The Mexican war department also ordered out cavalry and infantry. The Yaquis in rebellion complain that many of their tribal lands have been expropriated and that all demands for rehabilitation have been ignored.

Soldier in uniform

Soldier in uniform

Oldest Negro Regiment Disbanded Kingston, Jamaica.—The British Government has decided to disband the West India Regiment, the oldest negro unit in the British Empire. The decision has caused much disappointment here.

Ottawa.—The advisory board on tariff and taxation will initiate five new investigations of public utilities to be held in Ottawa on Tuesday and Wednesday, October 5 and 6. Several such investigations are already in progress.

The application set apart for preliminary consideration on the dates mentioned are as follows:

No. 10.—For the reduction of the customs duty on gabardines, by various payment-making concerns.

No. 11.—For reduction of the customs duty on unbleached cottons and wares used in the manufacture of ironing machines.

No. 12.—For reduction of the customs duty on lock bar steel pipe.

No. 14.—For reduction of the customs duty on inviolable chairs, by Mrs. Annie Chapman, Prince Albert, Sask.

No. 15.—Increase of duty on corn cobs, by B.C. Sugar Refining Company, Vancouver, B.C.

In the case of each application, it is assumed that the applicant will be given full opportunity to supplement any written statements presented to the board, and all other persons whose interests may be affected are free to present their views.

## Expects To Visit West

Queen Marie of Rumania Not Accepting Private Hospitality

Bucharest.—Toronto and the cities of Western Canada are likely to be in the Queen's itinerary when she leaves here next month for the American tour.

The Queen's monthly list is undetermined, but she is considering a tour embracing New York, Philadelphia, Washington, Buffalo, Toronto, San Francisco, Seattle, Western Canada and New Orleans, returning via Chicago and not touching England. The Queen desires to see as much as possible of the American continent from a tourist's point of view.

The visit is considered unofficial, but the Queen has decided not to accept private hospitality, having received too many invitations for her limited stay.

## Question Not Treated Seriously

Talk of Americanizing Canada Humors Says British Labor Leader

London.—The talk about the "Americanization" of Canada is the worst humbug decision in the history of the British Empire, declared H. Thomas, M.P., colonial secretary in the late Labor Government, in an interview here on his return from a visit to the Dominion.

Mr. Thomas remarked that once again he had been immensely impressed while in Canada with the patriotism of the British Empire and the spirit of enterprise in all directions there.

French Liner Collides In Fog Paris.—The French liner, Le Savoie, which left Havre on Sept. 11, to was reported having collided with a cargo boat in the fog. It is announced that the liner suffered some damage above the water line on the port side, but that nobody was hurt. The vessel is continuing normally on her voyage to New York.

## Expected That Next Parliament May Convene About November 20th

Ottawa—While no official statement shows the election has been forthcoming, the Premier, King, gives fairly the likelihood of the sixteenth parliament convening about November 20.

In this eventuality, the house, after acquiring parliamentary authority for the supply of the necessary treasury funds, would probably have a long adjournment for Christmas. A late fall session, it is also believed, would mean an endeavor to reconvene session by Easter of 1927.

Following the general election last fall, four out of slightly more than six weeks to allow all election writs returned, with the exception of Peace River, where a recent was held. In riding represented by probable members in the new King cabinet, the writs were returned last

year within from three to four weeks after the election. For this reason, it is thought that writs could be issued and returned in by-elections for the selected members in time for parliament to convene about November 20.

Cabinet making for Mr. King is simplified, it is believed, by the fact that approximately three-quarters of those who held portfolios in the former government will be back again. For the most part it is expected that they will occupy their old places.

Hon. E. M. MacDonald, former leader of the opposition, has announced his retirement from politics, and the likelihood is that he will be appointed to the vacant vacancy for Nova Scotia.

W. N. O. 1447

## To Build Mills in Canada For The Manufacture Of Artificial Silk From Pulpwood

When we gaze on a great forest tree it is not easy to visualize the terms of rich cloth and silk garments. And yet man, not content with silk, cotton, wool, linen and many lesser sources of clothing material, now employs wood for the manufacture of the latest textile—artificial silk. As you can see it is called by the trade. The basis of all artificial silk is cellulose, and cellulose is the principal constituent of wood.

As long ago as 1858, Count Hilaire de Chardonnet produced artificial silk commercially, but it has taken many years of incessant labor to bring the various processes to that stage of perfection which is essential to commercial success. That the industry has now become a manufacturing industry is shown by the fact that the world's production in tons has arisen from 2,500 in 1909 to an estimated 19,000 for this year.

The general principle underlying the manufacturing methods is the treatment of the cellulose with chemical reagents to give a gelatinous solution which can be forced through a number of minute nozzles into a bath of solution for in process into artificial silk. This solution causes the coagulation of the fluid emerging from the nozzles and thus creates the actual filaments of artificial silk, though the material has to pass through several other stages, varying with the process.

Now it finally emerges as undulating transparent gossamer to which we are now accustomed, but which would have amazed many a nineteenth century grandmother.

The possibilities for rayon manufacture in Canada, with her vast pulpwood areas, are enormous. The countries which were first to develop the industry, however, were not those which possessed most of the raw material, but those which already had the organization, the equipment and the markets for a big textile industry.

This, clearly being the case, it is already predominant in the manufacture of artificial silk, took the lead, followed by Switzerland.

Now the big producers and exporters are the United States, Great Britain and the countries of Central Europe that are prominent in the natural silk trade.

For a good many years Canada has supplied much of the sulphite pulp used for that purpose.

Since 1922 the natural resources Intelligence service of the Canadian department of the interior published a series of drawings attention to the increasingly favorable conditions for the development within the Dominion of artificial silk manufacturing.

The following year, Forest Products Ltd., largest manufacturers in the United Kingdom, sent engineers to plan in to investigate the possibilities, with the result that a plant was established in Cornwall, Ontario in 1924 at a cost of \$2,500,000.

This plant was the first of the kind in the world. The plant is now the preliminary of many others. Canadian Celulose Ltd., capitalized at \$7,000,000, is now constructing the plant at Drummondville, Quebec, and the Howard Smith Paper Mills have formed a subsidiary company called the Canadian Cellulose Company, which will be operated at Cornwall, Ontario.

A new concern, the Canadian Rayon Pulp Company, is erecting a \$2,000,000 rayon plant at New Westminster, B.C. The B.C. Pulp and Paper Company, formerly the Whelan Pulp and Paper Company, operating pulp mills in British Columbia, has been carrying on chemical research for some time in the utilization of sulphite for the production of cellulose and certain results and conclusions have been reached which, it is stated, may revolutionize the industry.

It is expected that the company is now proceeding with installation of a new plant for the manufacture of this sort of pulp. Many other companies are being organized in the Maritime Provinces and the Pacific Coast are also taking steps or considering means to enter this field which is so profitable, so large, and which Canadian resources, both of wood reserves and natural power supplies, are particularly adapted to support.

**B.C. Whaling Fleet Active**  
During the past two weeks 7,419 whales have been taken by the British Columbia whaling fleet. The largest whaler in the world was in the fleet and the largest 187. There are now a number of plants established on Vancouver Island devoted to slaughtering whales as well as to the various by-products, in the manufacture of various by-products for which there is a considerable demand.

It isn't easy for a man to keep cool when it is up to him to choose between the frying pan and the fire.

### Win Butter Prizes

#### Saskatchewan Buttermakers Are Successful At Toronto Exhibition

Saskatchewan buttermakers won many prizes at both the Canadian National Exhibition at Toronto and the Central Canada Exhibition at Ottawa. At both exhibitions the prizes were awarded on the best cream and buttermakers buttermakers were near the top of the list in practically every class.

"Saskatchewan won 17 prizes, seven of which were firsts, at the Canadian National Show, an accomplishment of which Saskatchewan buttermakers may justly feel proud," said P. E. Reid, provincial dairy commissioner. "The success upon the success of the creameries of this province at the big eastern fairs, counting on the heels of the big winnages recently at Vancouver, the exhibition at Ottawa, where there were not nearly so many entries from this province, is also said to be very creditable."

### Will Pay Prizes

#### Alberta Department of Agriculture Will Grant Honorariums to Prize Winners

The usual honorariums for grand championships and first prizes won by Alberta exhibitors at the Chicago International Exhibition to be held the first week of next December, will be paid this year by the Alberta department of agriculture.

The exhibitors from Alberta for this show will be collected by the department at the government seed cleaning plant, and the department will pay the freight or express on these exhibits from Edmonton to Chicago and return, and will arrange to put the exhibits in the show.

The special prizes offered by the department are for threshed grain, straw, clover seeds, baled hay, alfalfa, corn on the cob, etc.

### Desirable Trait in 'Huskie's'

#### One of Most Important is Learning to Grow on Cornmeal

In Alaska a good team of "huskies" now brings \$200 to \$700, depending upon their strength and the efficiency of their training. One of the most desirable traits in a dog used for team work is his training to eat human food.

It is necessary because the great danger of sled travel is the ate holes in the ice. To teach this they are often allowed to plunge into an ice hold stop so that the chilly bath may be remembered.

### Step

The average amount of "absolute rest" that is gotten during a night's sleep is only 11 minutes according to Prof. H. M. Johnson, of the Mellon Institute at Pittsburgh.

The number of the time he was active is usually muscular or mental action, such as take place during a dream and throughout the night.

There is plenty for any normal man or woman, the scientist declares.—New York World.

### Maple Sugar Out

#### Unseasonable Weather Cuts Down Production This Year

Owing to the unseasonable weather during the tapping season, the production of maple syrup and sugar in Canada this year showed a decrease as compared with the figures for the previous year. The quantity of maple syrup produced in 1925 amounted to 1,137,392 pounds, valued at \$1,250,337, as contrasted with 1,092,362 pounds, worth \$1,847,672 in 1923.

Maple syrup output totalled 1,746,270 gallons, valued at \$2,572,533, as against 1,672,993 gallons, valued at \$2,410,225 last year. The province of Quebec continues to produce over half of the total Dominion production of maple syrup and sugar.

### Coal Production For June

The output of coal from Canadian mines for the month of June was 47 per cent greater than the average for that month of the five previous years, the monthly report of the Dominion bureau of statistics announces.

The figures were 1,575,010 tons in June as against 1,135,728 tons in May and an average of 919,432 tons for the month of June during the five preceding years.

### Couldn't Find Him

A woman was having difficulty in teaching her new Chinese servant how to receive calling cards. She went outside and waited for some time. The next day two women called and presented their cards. Comparing them with that of his mistress, the Chinese replied, "Tickets no good. Can't come in."—The Outlook.

The one country in Europe that has the leastable the pace of copyright is Japan.

### Add Billion To Income

#### Products Of Farms Of Western Canada

#### Add A National Wealth

In a recent dispatch to the Toronto Globe, W. L. Smith, special correspondent of The Globe, and a former editor of the Farmer's Sun, called attention to the fact that approximately \$1,000,000,000 will be added to Canada's income this year, directly and indirectly, from the products of the farms of Western Canada.

Last year's wheat crop was worth \$400,000,000 to the growers, and it put the west in the prosperity column. Mr. Smith believes it is a fair assumption that this year the return will not be less.

"Western Canada is going into general farming more fully than in the past, and livestock, poultry, dairy products and vegetables will pile up the money returns at every point of handling. Altogether a round billion is in sight," states Mr. Smith.

The prospect is encouraging for the whole of Canada. Last year the field crops of the country were valued at \$1,125,000,000. The wheat crop will again increase materially the west's contribution to national wealth.

The prospect is encouraging for the whole of Canada. Last year the field crops of the country were valued at \$1,125,000,000. The wheat crop will again increase materially the west's contribution to national wealth.

### Planning For Poultry

#### Many Nations Sending Delegates To Ottawa Next Summer

Sixteen foreign countries have already accepted invitations to send delegates to the world's poultry congress to be held in Ottawa next summer. It was stated at a meeting of the congress preparatory committee at the Canadian National Exhibition.

Reports were received from committee members on different features of the congress and all reported progress in their work of arranging for the largest gathering of poultry authorities that has ever taken place in the Dominion.

The United States has agreed to send 1,000 automobiles to take part in the tour which is being arranged from United States border points to Ottawa and the American Poultry Association will stage one of the largest foreign exhibits to be presented at the congress.

Russia is sending a large delegation. Roply will be represented at the show, the Prince of Wales having decided to exhibit.

Lord Willingdon, Canada's new governor-general, will be the chief patron of the congress.

Arrangements have been made to take a number of the foreign delegates on a tour of Canada from coast to coast.

## Farming Is The Fundamental Source Of Canada's Wealth And Basis Of Our Prosperity

### A Little Known Industry

#### Mining For Timber Has Become Important Business

Digging in the earth for minerals is no new thing, but it is not generally known that mining for timber has been carried on as an important and lucrative business.

In a wide swamp near Chicago quantities of white oak logs are being recovered, the remains of a great forest that was submerged seven or eight thousand years ago.

Although the outer layers of wood have decayed, some chemical agent in the soil has made the remainder hard and durable and given it a delicate color, for which it is much prized.

Gold prospectors on the Charlotte River, in California, recently discovered in the bed of a river long since dried up, a valuable deposit of timber known as the she-oak.

Many of the logs unearthed had the appearance of having been cut and trimmed by human agency. This wood is also noted for its toughness, and is employed in the manufacture of ornaments and toilet articles.

In the pea bogs in Ireland deposits of bog-oak are frequently encountered. This wood, which is jet black and exceptionally hard, and provides a profitable industry for the inhabitants, who fashion it into ornaments, pipes, craves, and so on.

### Should Eat Little Meat

#### Drink More Milk and Add Eight Years to Life

By drinking more milk and eating less meat men could add eight years to the term of his life without harm to himself and to the world.

H. C. Sherman, professor of chemistry at the University of California, stated in a recent address.

The adequate diet determined by recent research work in nutrition, he said, is one that is rich in milk and meat to increase individual efficiency and vitality.

The public health movement promises to augment the life span by eight years, and this life span could be doubled, Professor Sherman thinks, by a universal shift in diet.

### Honey Yield In Alberta

#### Beekeeping Business Has Yielded Good Returns This Season

The beekeeping business of Alberta which is concentrated mainly in the irrigated districts around Lethbridge and Stirling has brought good returns this season. In the locality named the yield is estimated at more than a hundred tons from 2,000 colonies.

Last year most of the local honey was produced at 12 cents per pound. This year it is a price of better than 15 cents is being received despite the larger local crop. This is due to the fact that the United States market has been only 10 per cent of last year's output in that province.

### To Study Conditions

#### British Board of Trade Delegates to Visit Africa

Sir William Mackenzie, chairman of the board of trade delegation which is to make a study of industrial conditions on this continent, has arrived at Quebec from Liverpool, accompanied by F. W. Lovett, assistant secretary of the board, H. Mitchell, secretary of the ministry of labor, and H. C. Emerson, who will act as secretary of the delegation.

They will be several weeks on this continent, visiting numerous centers in Canada and the United States.

### Hay Exports Vary

One of the most variable Canadian export products is hay, according to the Dominion bureau of statistics, in view of the department of the interior. Exports of hay vary roughly between 50,000 and 550,000 tons annually, chiefly to the United States, Britain, France, New Zealand and the West Indies.

In the latter islands Canada hay has to meet competition from the United States, which is used as fodder and sold at very low prices.

### Wrap Parcels in Silk

To "carry your package home" in Japan is the matter of course thing to do. It is a "holy of high degree" silk will produce from the depths of her kimono sleeve a lovely time-softened old silken length that may have come direct from the Seven Thousand Gods of Japan or from Hsin Ancestors. It is considered ill-bred and common to a degree to wrap bare package through the streets.

Special beds, tables and chairs are now provided for tall men and women at a London hotel.

### Where Women Are In Demand

#### Are Outnumbered By Men In Australia, New Zealand and South Africa

In England there are 1,096 females for every 1,000 males, but the proportion of women in Australia is only 975 per 1,000 men. In New Zealand 957. In South Africa 945, and in Canada as low as 940—that is to say, while 94 per 1,000 women in England must remain spinster the dominions have large numbers of marriageable men doomed to bachelorhood. In Australia the ill-fated bachelors number about 90,000. In New Zealand 27,000. In South Africa 41,000. These are white men.

A considerable part of the Canadian apple crop is exported to other countries where it finds a ready market. The fruit is sold principally through co-operative organizations of fruit farmers.

### Too Many Books

Far too many books are published in the United States, Britain, France, New Zealand and the West Indies. The world would be just as well off

## PUBLIC SALE OF LAND

Department of Municipal Affairs.

Take notice that under The Tax Recovery Act, 1922, and The Sales of Public Lands Act, the following lands will be offered for sale by public auction, at the Bindloss Post Office, Alberta, at 2 p.m. on Monday, October 25, 1926. Approximate acreage is shown opposite each parcel. Information as to any parcel will be supplied by the undersigned.

# ROOPE TEA

"is good tea"

People who want the very best use Red Rose Orange Roope Tea

## Full Steam Ahead

Within a few days of the writing of this article the electors of Canada will journey to the polls in order to select their representatives in a new House of Commons and thereby also determine the political complexion of the Government. Before this article appears in print the verdict of the ballots will have been rendered.

Whatever that verdict may be, and at the time of writing it is very decidedly in doubt, it is to be hoped that it will be sufficiently decisive one way or the other to give the successful party a fair working majority in the next Parliament. It is in the interests of Canada that stable government be re-established and unquestionably the great majority of the people wish it.

Economic conditions throughout the Dominion are very satisfactory at the present time. Business is good and promises to be better, industry in all its branches is active, trade is rapidly expanding, and increased prosperity is everywhere apparent. What Canada now requires to not only maintain but to further advance these conditions, is a revival of the sense of doubt and indecision in government which has existed as a result of the stalemate in Parliament.

A young country like Canada can ill afford to "drift" at any time, but at no time is such a policy, or rather lack of policy, quite so dangerous as during those periods when decision and vigorous aggressive action are necessary to take full advantage of the flowing tide.

Quite apart from all partisan considerations, or whether Mackenzie King or Arthur Meighen head the Government, there are certain policies which the present and future welfare of Canada demand to be adhered to and further developed. They may well constitute fundamental principles in the programme of all Canadian Governments, and it is to be earnestly hoped that a Government will be placed in office sufficiently strong to carry them out. Filling the creation of such a Government, both parties might well unite to give effect to them.

In the first place, the policy which has been developed during the past few years, and for which Mr. Robt. has certainly deserves great credit, of negotiating trade arrangements with various countries should be persevered in. The present activity in Canada's manufacturing industries is the direct outcome of this policy which has resulted in opening doors and creating wider markets abroad for the products of Canadian industry. It is not a prospective tariff decline to shut foreign-made goods out of Canada that has brought present prosperity to manufacturers and the labor they employ, but the development of an export trade for exceeding anything hitherto known, and building up a favorable balance of trade amounting up to the hundreds of millions of dollars. Last year, for the first time in Canada's history, more manufactured goods were exported from Canada than were imported. This record should be maintained, and the favorable margin steadily increased. It can be done through the development of foreign markets, and the making of mutually advantageous trade agreements whereby such markets will be opened to Canada.

Secondly, unremitting attention should be devoted to the question of immigration. Close and expert study of every angle of this large subject should continue without any interruption, and necessary legislation passed, appropriations made, and efficient administration as free as possible of red tape provided. All the available resources of the Dominion should be located here to till the fertile agricultural lands and develop the many other resources of natural wealth which the Dominion can boast. There is no room for, and no reason for, party politics in dealing with this essentially great nation-building programme.

While Canada must continue to raise a large revenue for the Federal Government in order to meet and discharge our war obligations, further reduction in taxation should be made so as to relieve the individual taxpayer and release money for profitable and productive investment. The increased buying power of the people following tax reductions, added momentum given to business and in all lines of industrial activity, resulting in increased employment, will be great help to the business of the country. The Government will receive quite as large a revenue in the aggregate although each individual contribution will be smaller.

There are other matters calling for attention and definite action, but these three outstanding subjects of national importance should not be kept before the matter which the completion of the next Parliament and Government may be. Furthermore, the Government should be called upon to carry these policies into early effect. Lastly, the Government, whether under Mr. King or Mr. Meighen, should be accorded the support of the people as a whole in a united endeavor to give stability to government, sound administration, and vigorous action along broad lines of Canadian advancement.

## A Ruby Of Great Value

Human Image Is Seen In Jewel Found In India

Real rubies, sparkling like drops of pious blood, are beautiful jewels. But when one discerns, inside, a portrait made not by human hands, but by nature, it is unique and of surpassing value. Such a ruby has been found by a member of the Bengal legislative council. The natives consider it a gift of God, and the jewel assumes an importance that cannot be estimated in terms of cash. The stone is not large, but inside the outer surface, deep down behind a scarlet cloud, appears a tiny image of a man, dressed in white, with a dark brown face and deep brown eyes. The man is seen wearing a white muzzar (part of the national dress of the Hindus) and the rest of his body is covered by deep folds of a garment of silken white.

The more closely the gem is examined the more the image comes out in detail. The ruby was sent to the director of the geological department of the Government of India, and is of high value. He could not explain the portrait and so called it a "Crest of Nature" without a parallel.

## For Aches, Pains, The Safe Home Remedy NERVILINE

When sudden sickness comes, when the kiddies come in with colds, their coughs, colds, and fevers, when the family doctor is not at hand, NERVILINE is the safe home remedy. It is a powerful, yet gentle, remedy for all ailments. For young and old, to overcome the cold, to clear the chest, to soothe the throat, nothing compares with NERVILINE. 25 cents at all dealers.

## New Ray Discovered

Unlike X-ray It Can Penetrate Layer Of Lead

A description of the newly-discovered Millikan rays will be included in the next Smithsonian annual report on the compilation of which the institution is now engaged. These rays are invisible, but like X-rays, can penetrate matter as thin sheet of lead, however, will stop X-rays. Millikan's rays will travel through a layer of lead six feet thick. "It seems," says a bulletin of the Smithsonian Institute, "that all life is alive with these new rays. They do not originate on the earth, but come into us with the velocity of light from the great universe beyond the atmosphere. Probably they are formed by the breaking up of the atoms which compose the stars. No one can yet foresee by what remarkable uses they may come to serve us. When Faraday, in 1831, demonstrated that before the Royal Society that it was necessary to obtain an electric current was to use a coil of wire, the pulse of magnet, a woman in the audience asked him what use the electricity was to her. He replied, 'I know, formed the basis of all the modern electrical machinery. Parady replied:—

"Madam, will you tell me of what use is a new-born babe?" "Faraday's babe has grown up into a giant now. So he may prove with Millikan's."

**Breaks French Typing Record**  
The French record for rapid typing has been broken by Miss Pin, a typist employed by the League of Nations at Geneva. Her speed was 91 words a minute, striking the key at the rate of 10 times a second for 50 words. The old record was 91 words.

A saddle worth \$2,500 is owned by R. Garcia, El Paso, New Mexico. It is made of gold and silver is worked into it.

**Quicura Talcum**  
The Ideal Powder For Daily Use  
This pure, delicately medicated, antiseptic powder does much to overcome excessive perspiration. It soothes and cools, is convenient and economical and is an ideal face, skin, baby and dusting powder.

**Wanting Right Kind**  
According to the Bishop of London there are a million and a half of the right sort of people in the Old Country who are ready to come to Canada as soon as they are assured of a welcome. And, no doubt, Canada will furnish the welcome as soon as it is assured that they are the right kind of people. Woodstock Sentinel-Free Press.

A dead man is as much use in the world as a lazy one and he takes up more room.

## The Poisons We Love

Every healthy man, woman and child looks forward to the pleasure of an appetizing breakfast, a lunch and an abundantly provided dinner without giving a thought to the poisons which such table delights will, for so long as hold strong, send to the reader will recall the many popular gourmet with whom he was acquainted, who no longer seemed to meet him at the festive board, he can only be struck by the fact that almost every one of such friends were found dead, while the survivors have been in the prime of their lives. And if the actual cause of their deaths could be investigated, the fact would be the cancer scourge laid them low should give the reader food for carefully personal self-examination.

The refined foods, rich sauces, meats, delectable vegetables and fruits, white sugar and white flour from all of which the last trace of health-giving potassium and other salts have been deliberately or thoughtlessly extracted, unite in eroding more acids in the body than any human liver can either neutralize or dispose of economically. The consequent state of acidosis is the precursor of the now practically universal cancer, constipation and indigestion, the eminent English authority, published to the world: "Constipation is the forerunner of a Cancer of the Colon."

Another reason why cancer strikes civilized rich and poor in an impartial way is because civilization generally is suffering from an uncorrected potassium deficiency. This peculiar form of starvation is the cause of the establishment of cancer in the human body. Born stated in 1912, "The potassium deficiency he remedied by the use of potassium chloride retrograde. Upon the profound experience of knowledge, the famous English authority has been quoted the useful success of The Cancer Remedy, a natural food and mineral element arising from similar food poisoning. The Cancer Remedy of the deadly self-inflicted blood poisoning, which is the cause of cancer in fighting the disease. The application is made to Charles Walcott, 31 Brunswick Avenue, Toronto, 4, Ontario, Canada. See Canadian Cancer Remedy representative for The Cancerium Co. of England.

## ARE YOU AFRAID OF YOUR MEATS?

Proof That the Stomach is Weak and Needs Toning Up

Are you one of the many sufferers who dread eating? Are you afraid to eat, because of the food you eat? Are you afraid to eat, because of the food you eat? When the stomach is weak, and the blood becomes deficient, it becomes increasingly difficult to correct the condition. The stomach is the organ for the stomach that is not a tonic for the whole body; that a blood-building tonic, and a nerve tonic, and a tonic not only relieves indigestion, but adds to the strength of the body. Dr. J. D. Kellogg's Stomach Remedy, P.E.H. has proved the value of Dr. Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says: "I suffered from indigestion for a year or more. My food was not good and that would fail to describe it. My appetite was gone, constipation was present, and my nerves were on edge. I could not sleep well at night, and I was very nervous. I tried a number of remedies, but without much faith, after so many months of moderate exercise, and taking three boxes I noticed a change. My appetite was restored, my nerves were better, and I was able to take plain food without suffering as formerly. I am now able to make good blood, and that this good blood will restore the stomach and nerves. Anyone suffering from stomach and nerve troubles will make much in giving Dr. Williams' Pink Pills a fair trial."

Dr. Williams' Pink Pills are sold by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont. Write today for a copy of the free booklet "What to Eat and How to Eat."

**Says U. S. Cannot Claim Largest Plane**

Is Greatly Exceeded By British Bomber Declares Manufacturers  
Reports from the United States that the new bombing aeroplane Cyclops, christened near Philadelphia as the largest machine of the kind in the world, aroused British aeroplane manufacturers, who maintain that the claim is incorrect. It is announced at London that a new British plane, also a bomber, which has just passed its test, far exceeds the United States machine in many details.

The British aeroplane carries not only a load of bombs, but also a torpedo weighing more than a ton. Its engines have developed 1,400 horsepower against 850 of the United States machine. It is claimed. The machine is built of steel tubing and the whole plane weighs some ten tons.

Another "Grave" Worm Extirminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

It seems awfully hard for some people to be both good and interesting.

Minard's Liniment relieves stiffness

## for all Meats

Of course you enjoy Keen's Mustard with cold meats. Try this appetizing flavoured hot meats, too—roast beef, lamb, pork, bacon, sausages, etc.

## Believes Leprosy Is Curable

Medical Secretary to Leprosy Mission Optimistic About New Treatment

Dr. Robert G. Cochrane, who is not yet 30, has just returned to England by motor, after a tour of the world's principal leprosy stations.

In his capacity as medical secretary to the Mission for Lepers, he has recently visited every centre in Burmah, India, Siam, Borneo and the Philippines.

For four months Dr. Cochrane lived among lepers at one of the stations, spending his time attending to them and investigating their cases. He is very optimistic about future work.

"If you can get them early on in their trouble," he said, "many patients can be treated as outpatients. In all these early cases there is a great deal of hope. Medical advancement in treatment of the disease has been considerable in the past six years. It is necessary to recognize the disease early, then with efficient treatment and the segregation of old cases, the cure will be not under control. "Once victims realize that with early treatment the disease can be treated there will be no difficulty in getting them to come forward to the stations." By the end of this century leprosy should, with the help of right measures, be considerably reduced.

## A Lonely Queen

Rugulavsky Queen Is Called Timid and Melancholy

Queen Marie of Yugoslavia, daughter of Queen Victoria of Russia, and youngest reigning woman sovereign in the world, is a timid and melancholy young woman. At the age of 25 she has heretofore the rule of 15,000,000 persons, but separated from them by her ignorance of the language. From the time she was 16 her mother trained her in all modern queenly duties, but she could not teach her to overcome the characteristics of her mother's temper to make her lonely and isolated.

Twenty Lynchings in U. S. This Year  
Twenty lynchings have occurred in the United States so far this year, according to the National Association for the Advancement of Colored People. Two of the victims were white.

A train of sixty-five freight cars will be ordered to transport the bedding for the world's largest hotel, now building in Chicago.

## Made First Aeroplane Flight Across Channel

Frenchman Takes Trip Again This Time As Passenger

Louis Bleriot, who, in July, 1909, made the first air flight across the English Channel in a little 25-horsepower monoplane, has crossed the channel again by air, but this time as a passenger in a 120-horsepower air liner. It was his first flight across the channel since his historic one of 1909.

Mr. Bleriot has flown in France frequently since his eventful achievement of 1909, but has always travelled by steamship bilaterally in his frequent trips to England.

When the proverbial rainy day comes his men use borrowed umbrellas.

Mice and conclusions are not synonymous, yet women jump at both.

**BURNS**  
Always keep Minard's handy for burns, sprains, bruises and swellings.

**MINARD'S LINIMENT**  
"KING OF PAIN"

## Discovered High Explosive

Lloyd George Says Few Helped Britain In Great War

Former Premier David Lloyd George, at the summer school of the Inter-Jewish Federation at Bangor, revealed that Dr. Chaim Weizmann, Zionist leader, helped to save the nation during the war by his discovery of an essential ingredient of high explosives.

"When I asked what honor I could recommend him for he replied: 'I want no honor, but I would like you to do something for my people,'" Lloyd George said.

Lloyd George paid a tribute to Jewish war service, saying that no class responded more readily to the call than the Jewish people in every country. He declared the Jews are due to the country which they dwell and that it was a great mistake to imagine that a race which was international could not be national too.

**Wanting Right Kind**

According to the Bishop of London there are a million and a half of the right sort of people in the Old Country who are ready to come to Canada as soon as they are assured of a welcome. And, no doubt, Canada will furnish the welcome as soon as it is assured that they are the right kind of people. Woodstock Sentinel-Free Press.

A dead man is as much use in the world as a lazy one and he takes up more room.

## Should Have Different Name

"Immigrant" Likely Distasteful to Settlers Coming to Canada

The recommendation by the manager of the Robert Simpson Company Limited, that the term "immigrant" should be dropped in the case of new comers from the Mother Country, is deserving of attention.

The name "immigrant" suggests a rather unhappy-looking band of people usually pictured as having their few belongings in a wooden chest, their surplus, or immediate necessities, in a knotted handkerchief, and wearing a dejected air. As a matter of fact, most of the "immigrants" of today travel first or second class, and are well equipped with good education and belongings, and are fairly well off financially. Many have broken up, or left behind them, their homes.

To think the "immigrants" may be as distasteful as to call Canadian "colonials."

The term "colonial" is never used in the Old Country; it has been extinct for twenty years or more. Those who were once called "colonials" are invariably referred to as Canadians, Australians, etc.

A word to replace "immigrants" should be coined.

## Englishman Has Unique Hobby

Has Traveled All Over World Collecting Old Horseshoes

There is a man living in Bristol, England, whose hobby is perhaps odd, but he collects old horseshoes.

There he has picked up in all parts of the world, in Egypt, the Philippine Islands, South Africa, Australia, New Zealand, Java, etc.

The horseshoe from the Philippines was found in Manila, the capital of one of the islands. As the collector picked up the horseshoe, a Chinese lady was happened to be passing and said: "Lucky!" showing that even in the east this superstition is connected with horseshoes is known.

Although the collector has traveled all over America and Canada, China, Japan, he has not yet failed to find a horseshoe in any of these countries.

It is simply enough, he possesses only one English horseshoe, which he found but a short time ago.

The collector was in Yokohama just after the great earthquake, but although he searched the ruins for horseshoes, he failed to find any. What he did find were the charred remains of horseshoes.

This Bristol amateur cannot, however, claim an excess of good luck from the turning of his quest, but for his hobby has suffered considerable only during his world-wide travels.

## Marble Bath Up For Sale

Got From Solid Block For Late Queen Victoria

Queen Victoria's marble bath is for sale. Although it cost more than \$500 pounds it can be purchased for 250 pounds.

When Sir Robert Peel was prime minister he invited Queen Victoria to stay at Devon Manor, his mansion near Farnham, and went to agree to a request in making his home fit to receive his royal guest.

His much attention was directed to the bathroom and he engaged Italian craftsmen to construct a bath cut out of a solid block of white marble. The bath was made five feet seven inches long and as Queen Victoria's height was generally accepted as being under five feet she had ample room for her bath.

No one else has ever used the bath, which is still in its original setting.

## Her Simple Method

A fashionably dressed lady was remonstrating with her little boy who left the department store. "You should never push, my son. It is very rude."

"But what are you going to do, mother, when you don't know the name of the thing?"

"Why, just let the clerk show you everything in the case until he comes to the right one."

Exhibition Draws A Record Crowd

A new high record for attendance at the Canadian National Exhibition during the two weeks it operates has been made this year. 1,272,000 people having passed through the turnstiles from the opening on August 25 to the closing. The former high record was 1,050,000 made in 1914 and the figure last year was 1,151,200.

"In your sister's marriage, Willie?" "I dunno, I haven't been home since breakfast."

When you hear of a man without friends you may be reasonably sure that he is also without money.

## The Farmer In Politics

All Over the World the Tiller of the Soil Seeks Recognition

All over the world the farmer is raising hell. He is feeling his oats. If he is a peasant he is tired of his status. If he is a farmer he is feeling to become a peasant. So he is getting into politics.

In England he is demanding government attention—bounties or special legislation—to bring agricultural production up to the high standard of the war.

In France it is the French farmer who refuses to be taxed to pay for the war—American war debts, for instance. The French farmer did not wish the war. He was a pacifist.

The two smartest in Paris, working with the city diplomats at St. Petersburg and Germany, started the war. The French farmer gave his son to the war, and in many cases gave his home to the war. "That's enough," says he. "Let the city clerks who started and kept this war going to the war."

In America the farmer is voting for French cabinet that rises to vote for French war debts.

In America the farmer is voting to get into politics. He complains that the city clerks are voting to the radicalness of a measure. They are letting up against the industrial east. So Coolidge's control of the country is in danger of this election.

"The farmer in the dell" is feeling his oats. —From the Empress Gazette.

## A Miracle Of Design

Copying Spider's Web Would Tax Science To Its Limit

Writing in Modern Science, Mr. T. H. Snavely, author of "British Spiders: Their History and Habits," points out the theory that "The primitive spider was merely a hunter and not a weaver of webs. The earliest spider was of the type which still lives in holes lined with silk tubes, which widened at their mouth, and folded outwards to form a fringe round the opening. The general idea seems to be that this little fringe was found to be of use in catching flies, and the principle was extended until it culminated in the widespread and beautiful orb-webs of the garden spider.

Web, at first made against walls, or the top of a house, and later, as the spider grew more adventurous, it came to be spun in gorges and bays and elevated positions, and every change in environment involved a new system in the use of its sticky and supports. Certainly, the later-day spider's web—if indeed, it may be said to have brought in the modern idea of the web, and a celebrated engineer recently said that even to copy in steel or from the plans adopted, would tax modern science to its limit.

## She Knew About Paving

In front of a Jefferson Avenue home several youngsters were building a "new road" for their neighbor daughter.

"You can't get through here, the boys," she said. "That's a new road!" Then, "demanded the young lady indignantly, 'where's your detector?'"—Detroit News.

## The Maiden's Complaint

The young woman travelling with her stern-looking father was evidently not in bed of health. She was decidedly pretty but her cheeks were pale.

A kind-if inquisitive—passenger sliding up beside her forward and remarked sympathetically, "You're replying the father. 'It is an affection of the heart?'"

"Dear me," murmured the father. "Oh, no! Only a leucemia in the navy."—Pittsburgh Chronicle Telegraph.

## A Woman's Logic

Mrs. Jones cast a calmly new light, and it may be, a wholly reasonable one on the problem of woman's dress the other night. She and Mr. Jones were just her new gown rather critically. "Isn't it a little extreme?" he suggested. "A little short and too cut?"

"Well, I don't know," said Mrs. Jones. "They are coming to see me, aren't they—not the dress?"—The Argonaut.

## Many Cows On Prairies

Prairie farmers were long averse to milking cows, but they are now doing it in increasing numbers every year. The annual production in the dairy herds of Canada now have a value of \$11,000,000, an increase of \$2,000,000 in five years—and a large portion of that increase has been achieved on the prairie.—Farmer's Advocate.

## Good Excuse

Bellefleur—"What excuse have you for not being married?"

Bachelor—"I was born that way."

"How come you all call your man Adelphi?"

"Why, just cause he's always down in the deuce."

"I just spent a grueling half hour 'doing what'?"

"Doing the thing."

## Oldest Church In London

Tablet States Foundations Were Laid In 179 A.D.

What Mr. R. H. Smith, deputy keeper of the British and Medieval Department of the British Museum, describes as the oldest church in London is somewhat difficult to find.

To find it one must go to Cornhill, pass along a little grey by-way—St. Peter's Alley—and after walking a few steps one must suddenly on St. Peter's Church, with its old churchyard.

This is the spot to which all visitors to London who know of its existence make a special pilgrimage. There is a link with ancient London.

In the vestry there is a brass tablet stating that the foundations of the church were laid in A.D. 179 by Roger de Lacy. The Great Fire in London destroyed the church, and with the exception of a few great treasures, all it contained.

Sir Christopher Wren rebuilt it as it now stands. Its tower resembles a curious vase, resembling, a few pointedly heavenwards, and it is regarded as one of the finest specimens of Wren's work.

The Rev. George Bullock, the rector, who has been there for many years, will show visitors his treasures when they call at the church and tell stories which are woven into the history of centuries.

A few years ago excavators brought to light the foundations of the church in the Roman bricks of which are still to be seen by those who descend into the darkness.

## Hair Tint and Character

Color Seems to Have Bearing on Person's Disposition

People with dark curly hair standing very stiffly on the head are generally of a stern and dignified type; they are also often remarkably generous, and never bear malice for long. People with light, sandy hair are almost always a little selfish, with money rather clever, and of a slow, calculating nature. Dark people, with large, black or brown eyes and thick, wavy hair, are generally very hasty, enthusiastic, and imaginative.

## Travelling Schools In Ontario

Working in conjunction with both railways, the Ontario Government shortly will bring into use railway cars as classrooms along the railway lines of the sparsely settled sections of Northern Ontario.

They will be fitted with the most modern school-room equipment and will provide accommodation for a teacher who will be responsible for the instruction.

Just 275 cartons of "pool eggs" were handled in prairie Canada this year.

## "Great Divide Highway" Opened In Rockies

A splendid new motor road from Lake Louise to Field, B.C., representing another link in the Trans-Canada Highway, was opened recently, and is now being travelled over by hundreds of tourists from the Chateau Lake Louise, Banff Springs and other Canadian Pacific Rocky Mountain resorts.

The new road, which is called the "Great Divide Highway," was surveyed eleven years ago by the Dominion Government Parks branch, and just completed this summer. Those who have endured the roughest, most thrilling, and beautiful road in the world. Six thousand two hundred feet above sea level in some places, it is more than one thousand above the Canadian Pacific's great tunnels. It passes through the densest scenery in the Rockies and over the line where the waters divide and begin their journey to the Pacific and Atlantic.

The Great Divide Highway is laid from the Banff-Windermere road, which runs to Lake Louise, but next year the British Columbia Government will have completed the Trans-Provincial Highway from Golden to Field and it will be possible to motor from Vancouver through the Fraser Canyon, Kamloops, Revelstoke, and Golden and on to Field and Banff.

## The High Cost Of Sunburn

Ten Thousand Working Days Lost Every Week of Summer Says Doctor

Approximately \$700,000 can be saved to American employers if the practice of over-exposure to the sun at beaches to gain a coat of tan is discouraged, says Dr. Charles F. Faber, professor of skin diseases at Greenport Hospital, Brooklyn, at Atlantic City, as quoted in the New York Sun.

Bathers should be warned that lying in the sun for hours at a time is a dangerous practice which often results in serious harm," said Dr. Faber. "The skin cannot manufacture pigments quickly enough to protect one from injury unless the first exposures are of short duration and are lengthened only gradually. The sun emits more ultra-violet light during July and August than at any other time of the year. It may damage the skin cells and even produce death."

Dr. Faber estimates that 10,000 working days are lost every week of summer annually as a result of intense sunburn. Putting the average working wage at \$7, he sees a loss to employers of \$70,000 a week, or \$700,000 for ten weeks of summer.

## Does Work By Aeroplane

London Woman "Cop" Thinks Nothing Of Long Trips

Commandant Mary Allan, co-founder of the women's police service in London, has become known as Europe's "flying cop" since she is one of the most travelled police officials in the world. When possible she makes her trips by plane.

She thinks nothing of flying to Paris, Berlin, or other points in five to ten days on some important case in which a woman is involved, and back to London in the next day or two. The setting up of a woman's international police commission was due primarily to the efforts of Commandant Allan.

## Canada's Canal System

By the canal system of Canada, 1,520 miles of waterways have been opened up to navigation. During the navigable season 38,750 vessels aggregating 16,800,000 tons passed through these canals carrying over 200,000 passengers and nearly 15 million tons of freight.

## Letter in Mail Chute 18 Years

A New York rubber company has received a letter mailed 18 years ago, containing a check for \$20 in payment for two inner tubes. The letter was enough in the mail chute of the Mills building and remained there until workers discovered it.

## Threshing Is Done In Turkey by Women

who drive oxen hitched to a heavy curved plank over the grain.

## "Contempt Of Court"

Great Number of Acts Can Be So Called

Quite a number of sins, either of omission or commission can fall under this heading. In the actual court, itself, to assault any of its officers from judge down to the policeman, to talk, to applaud, in fact for anyone to say to interrupt its proceedings, can be taken as contempt. So, too, a juror refusing to take the oath or a witness declining to answer a question would also be committing contempt.

Outside the court, a newspaper that made an improper comment upon a case not yet decided would be guilty of contempt. Where a verdict has actually been given, comment is permissible, but for a journal to give an opinion that so-and-so is guilty before the court has decided the point would be gross contempt. Also, a doctor refusing to pay a debt when so ordered by a court may be sent to prison, not for his debt, but for his contempt.

## Advice Not So Bad

Sailor Lost In Montreal Falls Fire Department

George Hinde, a cook aboard the steamer Hunanaworth, in port at Montreal, wandered from his ship and lost himself in the West End.

"I'm lost," said he to a passer-by. "How am I going to get back to my ship?"

"Pull that handle there," he was told, "and they will look after you all right."

George pulled it, and a whole section of the Montreal fire department responded with a patrol wagon. Hinde unfolded his story to the police at headquarters and was released on \$50 bail. His ship was sailing and rather than lose a good cook, the captain pulled the bill.

## How Oldish Is Made

Process First Used Has Been Greatly Improved On

Originally, oldish meant a cloth or rough canvas laid over on both sides to the present day the old generally a leather process, but in the early days it was just pointed out in several coats, but as time went on a better method was found by spreading the oil by a method of spraying.

The oil is first boiled with certain salts, and is then sprayed into a current of air, the domical result being a semi-solid material, which again is mixed with various substances such as kerosene, and is then hung up and allowed to dry.

## Apology Was In Order

Japs Praying For Rain Drenched Citizen of U.S.

Drenched with water by a crowd before a seaside shrine at Hachiboshi, Japan, the secretary of the United States embassy believed an insult was intended. He reported the fact to the foreign office. An investigation revealed that the crowd was performing a ceremony, praying for rain, this ceremony, including water on the first passerby. Each lot officials were much chagrined upon learning the identity of the person drenched and apologized.

## Mamma Sets Example

Edna Bess, the noted English actress, in Mrs. Seymour Hume's private life and is the mother of charming twins. She tells a story of how one night, persuading them to go to bed, she said to the twins: "I wish you both to be as good as my chickens went to roost at that time."

"Yes," was the reply of one of the young hopefuls, "but the mamma has gone with them."

## Their Diagnosis

The widow of a farmer had some difficulty with her hen and wrote the following letter to the board of agriculture:

"Something is wrong with my chicken. Every morning I find two or three lying on the ground cold and stiff with their feet in the air. Can you tell me what is the matter?"

After a little while she received the following reply:

"Dear Madam: Your chickens are dead."—London Times.

## Helicopter Tests Successful

Alfred Hodge, with the aid of a pilot, Dr. George F. Meyer, of Jackson Heights, Long Island, made several successful flights and assumed stationary positions at a height of 100 feet in the air in a demonstration flight at Mineola, N.Y.

## Idea Originated In China

Oriental Use Fingerprints For Identification In 400 B.C.

Many of the world's greatest inventors and discoverers have had their origin in China. Other nations have made up recently new discoveries, only to find out that China, sleep and non-suspecting, knew all about them centuries before.

The use of fingerprints as a means of identifying people is a comparatively modern occidental discovery. But it transpires that Chinese used the fingerprinting as a means of identification, long ago.

In that early day fingerprints were taken on wills and on other documents to preclude fraud. A little later the system spread to India. Japan early adopted finger printing, but it only to identify criminals.

Even today a person convicted of crime in Japan is branded with ink and is only known by his fingerprints.

The lifting of much illicit labor in Africa and South America has brought fingerprinting to those continents. It was used to identify workmen.

From the earliest known fingerprint stamp to the present day the ink has been known to the skilled eye where two fingerprints were alike. The earliest stamp of ink is that of St. E. Henry, of England, exponent of fingerprinting, has divided the hand into 256,000 subdivisions for purposes of identification. There are four types of ridges, five different ridge characteristics.

Now Argentina is the only country to have national fingerprinting. For that reason it is claimed to be the one country where it is impossible to pass without a trace of one's identity. There is a record of the fingerprints of every one of the country's nearly 10,000,000 inhabitants.

## How Oldish Is Made

Process First Used Has Been Greatly Improved On

Originally, oldish meant a cloth or rough canvas laid over on both sides to the present day the old generally a leather process, but in the early days it was just pointed out in several coats, but as time went on a better method was found by spreading the oil by a method of spraying.

WORLD HAPPENINGS  
BRIEFLY TOLD

The Federated Malay States have given £100,000 towards the cost of the naval base at Singapore.

The up-to-date successor of the horse thief has been discovered with a report made by a New York aviator that his plane was stolen while he was at dinner.

The British Government have appropriated £100,000 in connection with the British Industries Fair in London and Birmingham from February 25 to March 4 next.

Mrs. Clara Von Kozlovskaya, Greek Rumania, celebrated her 120th birthday by taking her great, great, great grandchild for a first walk and taking six paces.

Germany and Sweden have agreed to abolish passport visas beginning Oct. 1. Similar alterations between Germany and Iquitos and Portugal became effective Sept. 1.

A cable from Paris announces the appointment of Dr. Paul Garneau, of Quebec, to the post of foreign assistant in the service of Dr. A. Gosset, one of the most prominent surgeons in France.

"Our Lady of the Air" has been consecrated as the patron saint of the aviators of Portugal. It is a beautiful image of the Virgin Mary, with arms uplifted toward Heaven, and it stands in a tiny chapel erected for it in the Centre aereport.

Special dispatches say two men, Samuel Melgarejo and Joaquin Silva, have been summarily court-martialed and executed at Vinland, in the state of Michoacan, because of seditions propaganda in connection with the religious question.

The Soviet has appointed a special commission to formulate laws and regulations dealing with opium, for the purpose of investing the state with complete control of the manufacture, import and distribution of it and its derivatives.

The Queen of Rumania will be one of the best protected passengers when she sails to the United States, numbers of her soldiers declared, denying reports circulated that she had refused to accept protection by a steamer that would not give her the royal suite or cabin.

In the presence of air statistics of the great powers of the state, a Japanese hydroplane with five motors generating 2,100 horsepower made its maiden flight in France. With a load of 11,000 pounds, the plane attained a speed of 50 miles an hour. It takes to the air from the water in 50 seconds.

## Britain Buys From Canada

Increase in Exports to United Kingdom at \$100,000

An increase of \$107,551,842 in the value of Canadian domestic goods exported to Great Britain during the twelve months ended July 31, last, as compared with the preceding twelve months' period, is shown in the latest statistics issued by the Canadian bureau of statistics. Exports of Canadian produce to Great Britain during the twelve months that ended at the date reached a total valuation of \$212,064,522, while from the corresponding period of 1925 they amounted to \$104,508,677.

Imports from the United Kingdom during the twelve months under review were valued at \$162,340,953, as against \$154,457,652 in the twelve months that ended July 31, 1925.

## Nothing Impossible

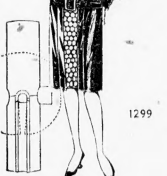

Sam was an old southern dandy whose amiability would never permit him to acknowledge a thing could not be done, even though he was utterly at a loss as to procedure. He was called by a tenant in the flat where he was junior to examine a leaky pipe. "Now, I could find that leak," he said, scratching a bewhiskered head, then added in a burst of inspiration, "I could just locate it!" Indianapolis News.

## Money Industry Growing

Considerable progress has been made in law reform in the western provinces during recent years. One legislator in Alberta, for instance, at times during 1925 claim was mentioned by the entire province in 1924. In Manitoba the money crop, reckoned in three years, and in Saskatchewan the (reaped crop of 1925 was over sixty-six times as large as that of 1918.

## Sending Reindeer To Seattle

Two Christmas reindeer, advertised in the United States, 225 live reindeer were loaded on the S.S. W. M. Tanager at Crow's Nest, on the Kuskokwim River of Alaska. More than 1,000 reindeer are now on their way to Seattle by the Tanager.

## The Cape Frock An Established Vogue

The cape has become a part of every type of the mode, and is no where more stylish than when used on the street frock, as pictured in this model of navy, trimmed with pale blue dotted silk. The cape is separate, but so flattering you will never want to take it off. It has a long V collar of its own to be tried at the neck, or the crewed one at the back and one at the front. The frock includes a straight, with a tailored collar ending in long revers, and a belt in pastel. The light sleeves are set in the armholes, and a wide belt is crissed into a big buckle. No. 1299 is for the miss and small woman, and is in sizes 16, 18 and 20 years. Size 18 years (26 bust) requires 3 1/2 yards 24-inch blue material, and 1 1/2 yards 54-inch blue material, and 1 1/2 yards 34-inch fabric. Price, 20 cents.

The secret of distinctive dress, the good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the style of the mode of the moment. Price of the book 10 cents the copy.

## How To Order Patterns

Address—Winthrop Newspaper Station, 375 McDermott Ave., Winnipeg

Pattern No. .... Size .....

Town .....

## Radio Stations Protest

Says Canadian Wave Lengths Prescribed By U. S. Statute, for Radio Stations in the United States are pre-empting Canadian wave lengths, thus preventing the opening of more Canadian stations. This charge was made at a meeting of the National Association of Broadcasters held in New York by A. R. McKean, radio director of the Canadian National Railways.

## World's Largest Cable Landed

The world's largest cable, 2,600 nautical miles in length, capable of handling 2,500 words a minute between the United States and England, has been landed at New York. The cable was brought ashore by the largest cable ship in the world, the Columbia, for the Western Union Telegraph and Cable Company, completing a three months' task.

## Too Late

Sophia, aged eight, to grandpa: "Grandpa (severely): 'Little girl should listen and not talk.'"

At the end of the dinner Grandpa, in a gentle mood, said the child and asked: "What was it you wanted, dear?"

"Oh, yes, Grandpa, there was a fly on the table, and you ate it."

## Big Steam Plant

Announcement, B. made that the Great Kootenay Power Company will spend \$1,000,000 in the construction of a steam plant on the Alberta side of the Alberta-British Columbia boundary at Crow's Nest. The work will be started this fall. The plant will utilize the coal from the adjacent mines in the Crow's Nest Pass.

The only thing that some people learn from experience is what fools they have been.

## Take Drastic Measures

United States Mail Clerks Get Orders To Shoot To Kill

"Shoot to kill" orders have been issued to 2,500 railway mail clerks as a drastic means of protecting the precious postal treasure from bandits the United States post office department has announced.

If this method of defensive warfare against the underworld proves inadequate, post office department authorities indicated the United States Marines might be called in again to guard the mails, as they did in 1921.

The command not only applies to railway mail clerks, but to all post office employees, and is intended as a warning to bandits who make a business of robbing mail trains. The order instructs all employees to defend mail property even at the expense of their own lives.

The recent Chicago holdup, when \$125,000 in currency was stolen, is said to have inspired the order. Postmaster-General Hunt issued the command after a sudden conference with postal experts.

## Holland Made Tulip Popular

The tulip, called by the Turks the turban flower, was brought to England from Vienna in the latter years of the 16th century. If Holland cannot claim it is a native, there is no doubt that the Dutch contribute in large measure to its popularity. During the tulip mania of the 17th century bulbs in Holland were worth their weight in gold, and in 1629, 120 specimens were sold for 90,000 florins. Finally the government had to interfere to stop the boom, for bulb growing was beginning to hamper agriculture.

## Goes Back To Potsdam

German Anti-Republicans Glad to Have Former Crown Prince

Former Crown Prince Friedrich Wilhelm has arrived at Potsdam, the favorite residence of his ancestor, Frederick the Great, and now a fortress of the German anti-Republicans who are delighted to have a Hohenzollern there again.

The former crown prince, who hitherto has been living the life of a country squire in his castle at Sigmaringen, which he has taken away from him as a result of the government's measures in connection with the former crown prince's property, says he intends to live a "quiet, secluded life."

## More Appropriate

"In your sermon you spoke of a baby as a new wave on the ocean of life," remarked Mr. Youngblood, "quite so," replied the clergyman. "A perfect stage of speech."

"Don't you think," suggested the harassed member of his flock, "that a fresh squall would hit the mark better?"

When a single girl asks a single man if he smokes, the plot begins to thicken.

## An Expert on the Game

"Billy Heith, famous British poe, and his wife, who have come to Canada to make their home here. They were photographed on board the Canadian liner Albatross just before she docked at Montreal last Monday. Mr. Heith has been poe for the British club since 1890, and is an expert in every phase of the game."

## A Little Miss and a Big Man

Though her proximity to a life belt might seem to indicate certain fears of the broad beam of the Atlantic on the part of Miss Mary Ferguson Lawson, aged 6, of Winnipeg, you would be wrong in supposing it, since the young lady has merely taken this position for purposes of photography. Like many more experienced travelers, Mrs. Lawson chose the Canadian Pacific liner Empress of Scotland, which, of course, are included her commander, R. G. Latta, and her purser, J. Walker Bartlett. The tall man—as the most satisfactory means of trans-Atlantic locomotion for a young and unaccompanied traveler. On all three sides of the shipper and the purser, have been most of the great ports of the world, as well as many of its out-of-the-way corners on numerous cruises, and have traversed the Atlantic many a time.

Mary was born in Winnipeg, but lived with her mother in England. Now her mother is dead and she is going to live with an uncle, R. W. Ferguson, at Woodstock, Ont.

## Want British Films

Six Princesses Announced in Plan To Break U. S. Motion Picture Monopoly in India

Six Indian princesses are associated in a scheme to spend \$1,000,000 in an attempt to break America's motion picture monopoly in India and open a new market for British productions.

The plan is to organize a chain of 300 theatres, showing only English films in the principal cities of India.

The King Khan, the Maharajah of Alwar, Patil, Bikaner, Jaipur and Kashmir are donating funds to the movement, but declare they are not interested in the profits.

Hungarian Peasants Sell Children

Sold to children, Hungarian peasants are said to be so common, due to the terrible plight of the peasantry, that regular market prices exist.

The maximum price of £25 is paid for children from thirteen to fifteen years. The buyers are farmers looking for cheap, unprotected labor.

Early Gloom: Notice any improvement since last year?

Caddy: Had your clubs shined up, haven't you?

## Care of the Tooth-Brush

That we should sterilize our tooth brushes is the advice communicated to Clinical Medicine (Chicago) by E. J. Cannon, New Mexico.

Newspapers and magazines, he writes, are all advising people to brush their teeth from one to six times a day. Some advise vigorous brushing even to the point of causing slight hemorrhage; others are silent upon this point. Some of the advocates even mention the fact that the brush should never be filled before use. He goes on:

Tooth-brushes are found hanging from the walls, lying on the tops of dressers or in trunks, kicking around in the soap dish, and almost anywhere except in a sanitary and proper place. In these places the brushes gather dirt, dust and bacteria. A tooth-brush should be used morning and night and should be sterilized before using; moreover, it should never be used so vigorously as to cause bleeding of the gums, because the mouth is always coming in contact with it, and ways waiting for a favorable point of entry, such as it is furnished by lacera-

lions in the mouth. Porphyria is becoming more frequent, and use tooth-brushes. Take nothing for granted, but assume yourself that there is no possibility of your direction being followed by the public. In 1916 there were 219,105 farmers in those provinces and the division of one total by the number of acres the section at \$746.22. Assuming, therefore, that all traffic should be credited to the settler, that sum is the average yearly income of the settler. The revenue of the railroad. \$746.22 capitalized at 5 1/2 per cent, being interest received in paying on the Victoria Bonds, gives a return of \$12,568.62, the value of each average farmer to Canada.

## Manitoba Grown Hemp

Numerous Articles Now Manufactured From Local Products

A striking display of the products to be produced from hemp is on display in the Canadian exhibition on Main street. This exhibit, put up by the L. J. Kery Fibre Mills, consists of great quantities of straw, fibre from Canada, the M.A.C. Russian hemp and sweet clover straw. It is a very good example of the use of hemp and green flax and upholstering tools are on show. The different types of cord, running from raw rope made from flax straw through a simple clothes line, garden lines, binder twines and smaller cords, as well as roofing felt, casing and flax fields, are a few of the products which are exhibited.—Free Press.

## English Nurse Is Plucky

Nearest Neighbor in Central Africa Five Days' Walk Distant

At the latter end of last year, an African attractive young lady has come from her home at Bonn, Staffordshire, taking with her a sort of "Moorish" nurse, which is believed to effect a cure of the dread disease. She is a medical missionary, whose headquarters are at Zomba, in the Nyassa. - She is the only nurse in a radius of 60 miles, and her nearest neighbor is five days' walk distant. "I suppose you have walked over the house at night," she states, "but I am not afraid, because there are skilled men about with them. I have been before she left to visit England eight man-eating lions killed 50 villagers, but they were all eventually trapped."

## Terror As a Check

As long as there are persons who are so much frightened by the possibility of a murder trial that they are afraid to prosecute, the law is a mere process of justice. It must be expected that sentences of surprising leniency in proportion to the crime will sometimes be imposed. Not until murder becomes so prevalent that people are thoroughly frightened will they be able to prosecute as undaunted public enemies, who must be put where they can do no more harm. This point of terror must be to be rapidly approached.—New York Herald Tribune.

Cement Production Shows Increase

A statement issued by the Dominion Bureau of Statistics at Ottawa states that the value of cement products in Canada during 1925 amounted to \$2,929,329, an increase of 61 per cent. over the \$1,815,871 produced in the previous year and 34 per cent. over the \$2,060,228 reported for 1923.

Plans making cement products such as bricks, building blocks, pipe, etc., a full stone, etc., represented a capital investment of \$2,084,176.

## Keep Animals On Roof

A little cat the dealer was killed recently when a cow slip from the roof of his house into the dining room. Animals, often are kept on top of houses in Peru, and it frequently happens that a cow pusses her whole life on a roof, being taken down by a calf and finally brought down as fresh beef.

The population of the earth doubles itself in 250 years.

A man never grows when he gets in the man's shoes.

## The Value Of A Farmer

By Chas. W. Peterson

There is no subject which should interest the smaller towns all over Canada than the development of their rural trading areas to the greatest possible extent. A study of the value to Canada that the development of its rural trading areas is illustrating. It is shown that over 162 million dollars have been brought to this country in cash and effects by immigrants. This new wealth has played its important part in the development of the country. Prof. Irving Fisher calculates the total productive value of the average individual in the state is \$2,900. The average newborn child has a money value of \$35—the value increasing to \$1,000 by twenty years and dropping to \$2,900 at fifty years of age, according to accepted calculations.

Canadian railways are vitally interested in ascertaining the traffic value of a settler. Some years ago able statisticians obtained as a basis, the percentage of freight traffic derived from agriculture (horses, cattle, sheep, pigs, wheat, corn, barley, flax) coal, and in and out going. In the year 1916, the exact percentages of each of the railways were worked out, based on the total grain movement for the year between 2nd of September and 31st of August, 1916. Total for the three prairie provinces alone for the percentage of revenue above referred to was \$16,516,413. In 1916 there were 219,105 farmers in those provinces and the division of one total by the number of acres the section at \$746.22. Assuming, therefore, that all traffic should be credited to the settler, that sum is the average yearly income of the settler. The revenue of the railroad. \$746.22 capitalized at 5 1/2 per cent, being interest received in paying on the Victoria Bonds, gives a return of \$12,568.62, the value of each average farmer to Canada.

If we capitalize that portion of the national income which is ascribable to human effort it is found to be from \$1,000,000,000 to \$1,500,000,000. The total amount of life insurance in force is only a fraction of this capitalized value. We may, therefore, readily see that the contribution of Canada's "littles" is easily our greatest. If so, it seems to follow that it is reasonable to expect that the value of the individual is easily our greatest. If so, it seems to follow that it is reasonable to expect that the value of the individual is easily our greatest.

Prize in Council Is Passed by Manitoba Government

Order-in-Council is passed by Manitoba government, which is believed to effect a cure of the dread disease. She is a medical missionary, whose headquarters are at Zomba, in the Nyassa. - She is the only nurse in a radius of 60 miles, and her nearest neighbor is five days' walk distant. "I suppose you have walked over the house at night," she states, "but I am not afraid, because there are skilled men about with them. I have been before she left to visit England eight man-eating lions killed 50 villagers, but they were all eventually trapped."

## Had Best of Argument

A story is told concerning Father Bernard Vaughan when he was touring in America. A hostile American at St. Louis said to him one day, "Look at my Mississippi and Hudson Rivers. Why, in comparison with them your Mercy and Severn and Thames are mere rills, silly streams."

"Oh," said Father Vaughan, "I think yours are just as silly as ours." "How do you make that out?" inquired the American. "Well, they are considered the best," replied Father Vaughan.

## Rations For Elephants

Tame elephants, many of which are burdens of burden in the Orient, eat an enormous quantity of food. A full grown elephant, in domestic life, will eat on an average a thousand pounds of green food and not less than 25 pounds of unskinned rice daily. The problem of properly feeding a tame elephant is a big one.

## Still Applies To Some

Many a person who is a small eater has feelingly been described as having "a bird's appetite." How inaccurate this designation is, when we glance when one learns that many birds eat several times their own weight each day.

Opportunity knocks but only once, but you tried and then friends knock all the time.
